Brainstorm & Idea Prioritization Template

Date	15 July 2026
Team ID	SWTID-2026-3760
Project Name	Smart Lender:Machine Learning-Based Loan Approval Prediction System
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Financial institutions receive thousands of loan applications every day. Traditional loan approval methods involve manual verification, which is time-consuming and prone to human error. To improve efficiency, banks need an intelligent system that can quickly analyze customer information and predict loan eligibility.

The Smart Lender project uses Machine Learning algorithms to automate the loan approval process, helping financial institutions make faster and more accurate lending decisions

Step-1: Team Gathering, Collaboration and Select the Problem Statement

The Smart Lender project began with a collaborative brainstorming session involving all team members. During the discussion, the team analyzed the challenges faced by financial institutions in the traditional loan approval process, such as lengthy verification procedures, manual errors, and inconsistent decision-making.

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Project Name
Smart Lender

Project Description
A machine learning-powered web application that predicts the creditworthiness of loan applicants and helps financial institutions make faster, data-driven loan approval decisions.

Team Members
Team Smart Lender

🕒 10 minutes to prepare
🕒 1 hour to collaborate
👥 2-8 people recommended

➔

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

 **Team gathering**
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

 **Set the goal**
Think about the problem you'll be focusing on solving in the brainstorming session.

 **Learn how to use the facilitation tools**
Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

How might we build an intelligent system to predict loan approval accurately and reduce manual evaluation time?

 **Key rules of brainstorming**

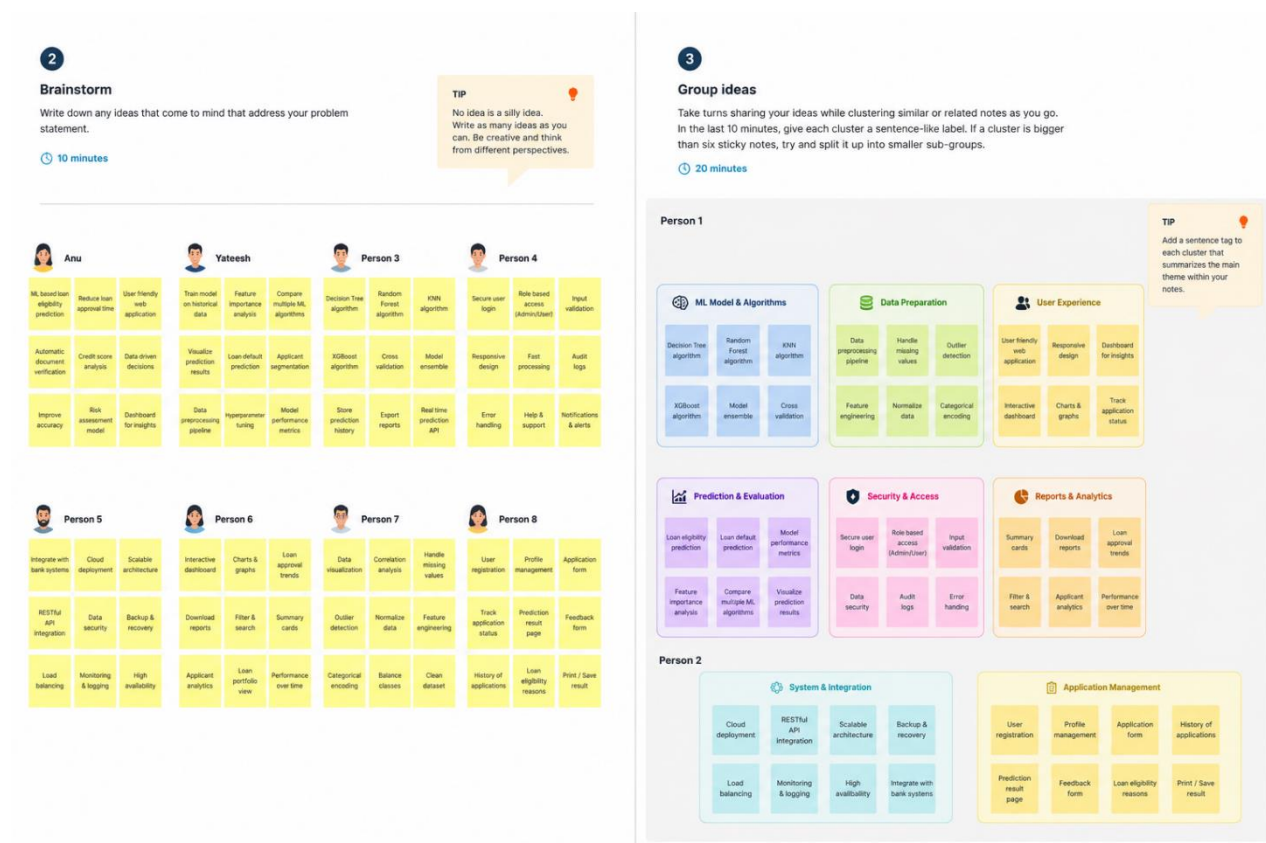

To run an smooth and productive session

😊 Stay in topic.	💡 Encourage wild ideas.
⏸️ Defer judgment.	👂 Listen to others.
🗣️ Go for volume.	👁️ If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

The team conducted a brainstorming session to identify innovative ideas for improving the traditional loan approval process. Each member proposed solutions based on their understanding of banking systems, machine learning, and web application development. All ideas were collected, discussed, and grouped according to their functionality and relevance

Step-3: Idea Prioritization

4 Prioritize

Our team discussed and evaluated all ideas based on their importance (impact on solving the problem) and feasibility (how easy and practical it is to implement).

We placed each idea on the priority grid to decide which ideas to focus on first.

🕒 20 minutes
