

Ideation Phase

Define the Problem Statements

Date	15 July 2026
Team ID	SWTID-2026-3760
Project Name	SMART LENDER
Maximum Marks	2 Marks

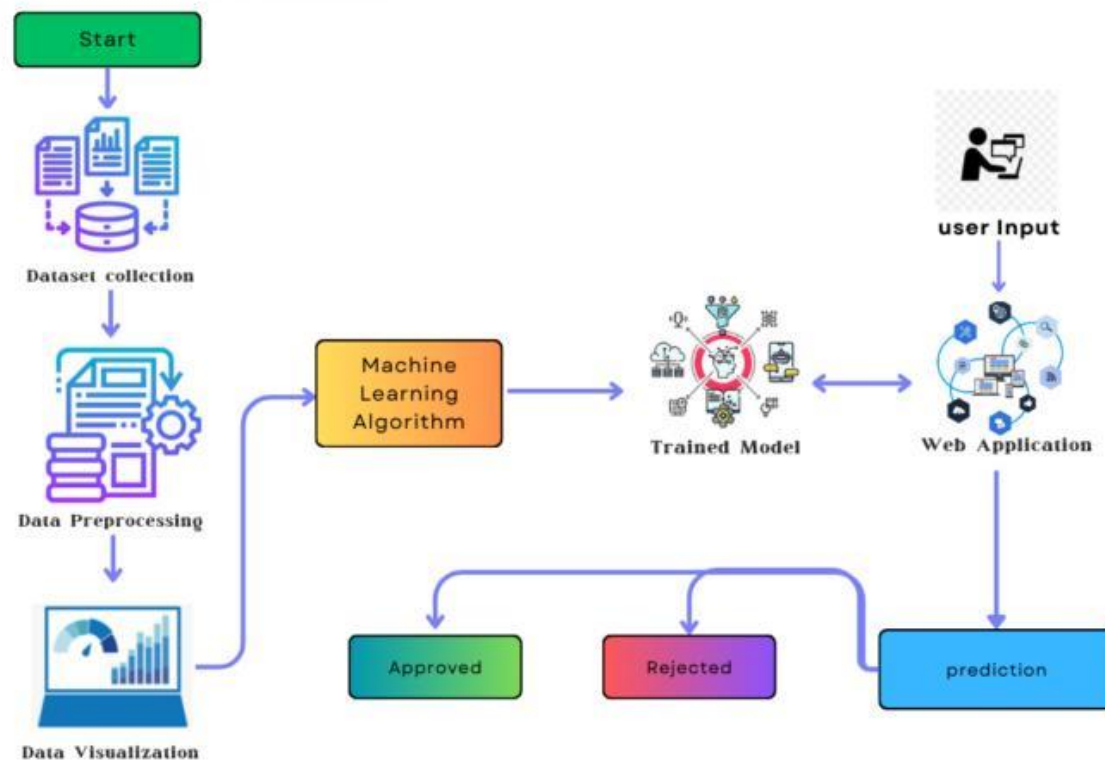

Customer Problem Statement Template:

To overcome these challenges, the **Smart Lender** system uses Machine Learning algorithms to analyze applicant information and predict loan eligibility automatically. This approach reduces manual effort, improves prediction accuracy, speeds up the loan approval process, and supports better decision-making for financial institutions

 I am	<i>Describe customer who is a key characteristics – who are they?</i>	A loan applicant (individual) who is seeking financial assistance from a bank or financial institution.  Attributes: Age between 21–60, salaried/self-employed, needs loan for personal, education, home, or business purposes.
 I'm trying to	<i>List their initiative or "job" the customer wants to do – what are they trying to achieve?</i>	Apply for a loan and get quick, fair, and accurate approval.  Goal: Get the required loan with minimal delay and paperwork.
 but	<i>Describe what problems or barriers stand in the way – what hinders them?</i>	The loan approval process is slow, involves extensive documentation and manual verification.  Barriers: Long queues, multiple visits to the bank, unclear eligibility criteria, inconsistent decisions.
 because	<i>Enter the 'root cause' of why the problems or barriers exists – what needs to be solved?</i>	Banks use manual processes and traditional evaluation methods, which are time-consuming and prone to human errors.  Root Cause: Lack of automation and data-driven decision-making.
 which makes me feel	<i>Describe the emotions from the customer's point of view – how does it make them emotionally?</i>	Frustrated, worried, and uncertain about whether my loan will be approved on time.  Emotions: Stress, dissatisfaction, lack of trust, and anxiety.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A loan applicant	Apply for a loan and receive approval quickly	The loan approval process is slow and requires many manual checks	Banks verify documents and credit history manually	Frustrated and anxious about delays
PS-2	A bank loan officer	Evaluate loan applications accurately and efficiently	Reviewing every application manually takes a lot of time and may lead to errors	There are many applications with large amounts of customer data	Stressed and concerned about making incorrect lending decisions
